

Date of submission

Dear *University of Ottawa Journal of Medicine*,

Our manuscript "*title of manuscript*" is enclosed for consideration of publication in the University of Ottawa Journal of Medicine.

Our study is a *type of research article (e.g. randomized controlled trial, prospective cross-sectional survey, retrospective case study etc.)*. The objective of our study is (*state the study objective in one to two sentences*). For this remaining paragraph, the author should describe the main findings of the study and state the implications. When applicable, describe how the present study differs from previously published literature.

Authors should certify that all co-authors have read the final version of the manuscript and participated in the study substantially.

Authors must certify that patient consent has been obtained for any patient data included in the submitted work.

Authors must confirm that the manuscript has not been accepted elsewhere for publication.

All conflicts of interest and financial sources must be disclosed, including agency name and country, and grant name when appropriate.

Yours sincerely,
